CON -Series

EXMILE CURED-ON solid tires provide a high percentage of natural rubber in the tread compound, giving them the longest wear possible even in the most extreme applications and offering low rolling resistance to ensure longer battery life or lower fuel consumption. Exmile's super adhesion strength between the compound and steel will also ensure an extended life. These traits make EXMILE the best cured-on tire manufacturer for either the small or global OEM customers. It is also the best choice for any aftermarket application where the lowest cost of ownership(cost per hour used) is desired.

These tires are approved by the following OEM customers around the globe.

MANITOU Genie AIRO Dingli Machinery

Size & Specifications
